

Simple.

Portable.

Powerful.

iVue[®] SD-OCT

Bring the power of iVue SD-OCT to your practice.

Ganglion Cell Complex (GCC®) Upgrade

for early glaucoma management

The power of the GCC Upgrade can identify ganglion cell loss which may be an early indication of glaucoma. GCC loss precedes RNFL loss based on The Glaucoma Continuum.*

Ganglion Cell Complex Thinning in Glaucoma

Glaucoma patient with thinner GCC

GCC® Thickness Mapping

Fixation for the GCC map shifts the scan pattern to increase sensitivity to structural changes that correlate to a nasal step defect.

In addition to Glaucoma, the GCC Scan also helps to identify retinal and neurological disorders.

3D/En Face Analysis Upgrade

for early retina diagnostics

Epiretinal Membrane from En Face Analysis

Pigment Epithelial Detachment

Drusen

- Virtual dissection of the retina and optic disc
- 512 X 128 dense cube with 67 million data points
- Unveil epiretinal membranes, microaneurysms, hard exudates, choroidal neovascular membranes, and more

3D Optic Disc

Macular Hole from 3D Macula Scan

Enhanced 3D evaluation to detect micro pathology earlier.

RETINA

Retina Mapping

6 x 6mm Retinal Thickness map
7 Line Hi-res Raster
250 micron separation

Retina Change Analysis

3D Macula - Upgrade Now Available
512 x 128 Cube

GLAUCOMA

OU/Symmetry

RNFL Mapping with
Change & Symmetry Analysis

Ganglion Cell Complex Mapping

- Upgrade Now Available

3D Optic Disc - Upgrade Now Available
512 x 128 Cube

CORNEA/ANTERIOR SEGMENT

Pachymetry Mapping

Full 6mm diameter Corneal Thickness Map
Cornea B-scan slice

**Angle with FDA Cleared
Measurement**

OU Angle

Cornea/Anterior Segment Features

for non-contact Anterior Segment Assessment

Pachymetry - Full 6mm diameter corneal thickness mapping with minimum thickness indicator (example of Keratoconus)

Angle Visualization with FDA Cleared Measurement

Contact Lens Fitting

iVue Versatility

expand your OCT World

Optional Rolling Case
26" x 18" x 17" @ 24 lbs.

Optional iStand
for universal iVue positioning
such as supine scanning

The next wave of the revolution **is here**

The first Spectral-Domain OCT for every clinical practice. The iVue SD-OCT is the next phase in advanced OCT product design and the first true WorldOCT™.

With the complete offering of retina, glaucoma and anterior segment scanning as standard, iVue is the perfect advanced, yet easy-to-use OCT for clinical practices. The streamlined user interface, small foot print, and familiar slit lamp style delivery design all contribute to fast and efficient clinical use and patient throughput.

Specifications:

iVue Scanner:

OCT Image: 26,000 A-scan/second
Frame Rate: 256 to 1024 A-scan/Frame
Depth Resolution (in tissue) : 5.0 μm
Transverse Resolution: 15 μm (retina)

Scan Range:

Depth: 2 - 2.3mm (retina)

Scan Beam Wavelength:

$\lambda=840\pm10\text{nm}$

Exposure Power at pupil:
750 μW

OCT Fundus Image (En Face):

FOV: 21°(H) x 21°(V)

Minimum Pupil diameter: 2.5mm

External Image (Live IR)

FOV: 13mm x 9mm

Patient Interface:

Working Distance: 22mm / 15mm

Motorized Focus Range: -15D to +12D

Computer:

Laptop PC

Intel Core i5 Processor

15.6" Screen

RAM: 4GB

DEFINING THE OCT REVOLUTION
